

Connecticut All-Electric Residential Opportunities

Whether you're a homeowner or a builder looking for all-electric new construction, electric vehicle charging, solar, or battery storage incentives, Eversource has you covered. Take advantage of attractive rebates and program offerings that make it easier for you to electrify your home or your customer's home.

ALL-ELECTRIC NEW HOME CONSTRUCTION

All-electric homes use high-performance air source, ground source, or air-to-water heat pump technologies for heating, cooling and domestic hot water. They feature super-insulated building envelopes to minimize heat loss, leaks and drafts that can cause occupant discomfort and raise energy bills. All-electric homes have no fossil fuels on site and do not rely on them for power. They are designed to provide increased comfort and better air quality, reduce energy and maintenance costs, and better sustain home value over time. Eversource offers a bonus of up to \$10,000 for building an all-electric home.

More information is available by visiting eversource.com/new-construction.

ELECTRIC VEHICLE CHARGING

Charging at home is one of the most popular advantages of electric vehicles, and we have rebates to help with the purchase and setup. Eversource offers a \$500 rebate on qualified Level 2 Smart Chargers, and you can get another \$500 rebate to help with the costs of a home wiring upgrade to power your Level 2 Smart Charger. You'll also be enrolled in Managed Charging, which can help you continue to earn even more for years to come.

Visit eversource.com/home-ev-charging to get started.

BATTERY STORAGE

Equipping your house with a battery storage system can help you be more prepared as storms become more frequent. You can charge your battery in good weather and use it to run your essential appliances when the power goes out. Eversource offers two rewards programs for home battery storage systems. Both programs reward you for allowing us to use your battery system to lessen strain on the electric grid.

Visit eversource.com/home-battery to learn more.

RENEWABLE ENERGY SOLUTIONS

Through Renewable Energy Solutions, you can sell the power you generate with your residential solar installation and any renewable energy certificates (RECs) to Eversource. On your application, you'll be able to select from two incentive compensation options: Buy-All and Netting. Each is designed to provide a similar return on investment. You may also qualify for additional income-based incentives.

Visit eversource.com/solar for more information.

CONNECTEDSOLUTIONS

Earn rewards for helping us reduce stress on the power grid and lowering New England's carbon footprint. Eversource's ConnectedSolutions demand response programs are designed to help you better manage your energy, by allowing us to adjust the energy use on select devices in your home during times of peak demand or stress on the grid. Enroll today, and you can earn rewards without sacrificing comfort or convenience in your home.

Visit eversource.com/demand-management to get started today.

If you're interested in participating in more than one of the above opportunities, please call 1-877-WISE-USE so that an Eversource representative can guide you through the process.
